

Testimonial

Nexa® Training System

“We want to provide our students an education with a practical orientation. With the Nexa Training System Heliocentris provides a variable learning aid that is predestined for it. ”

Prof. Dr.-Ing. habil. E. Brenner/A. Fröde

Institute HTW Dresden (FH)
Department Electrical Engineering
Website www.htw-dresden.de
Location Dresden / Germany

Use of Product

- » Teaching basics about fuel cell technology
- » Analysis of influencing variables
- » Connection of own system components to the Nexa® Training System

Advantages of the Product

- » Modular design suitable for teaching basics as well as complex lab experiments
- » Easy handling
- » Comfortable hydrogen supply through metal hydride canisters

Why Heliocentris

- » Right solution for safety requirements
- » Reliable customer support
- » Extensive application experience
