

Client Testimonial

Institute / Company: St. Petersburg State Electrotechnical University
Department: Electronics and Microelectronics
Homepage: www.eltech.ru
Location: St. Petersburg / Russia

- ▶ “The future belongs to Hydrogen. Heliocentris paves the way. The teaching of Hydrogen and fuel cell technology belongs into every electrotechnical and polytechnical institute.”
(Prof. Jewgenii Terukov, Professor and head of laboratory)

Instructor & Professional Complete

▶ Project / Use of Product

- We have two Instructors and one Professional which we use to educate our students in hydrogen and fuel cell technology
- The products are used in our course „Alternative Energy Sources“, covering the hydrogen part with the Instructor and the solar energy part with the Professional of Heliocentris
- The products are used in lectures as well as in individual and group experiments by lecturers and students

▶ Why Heliocentris

- Heliocentris was in every phase of our cooperation very professional, competent, with a short response time
- Our questions were always answered quickly and comprehensively
- We want to work again with Heliocentris in the future and recommend them highly

▶ Customer Benefits

- We are highly pleased with the Instructor and the Professional
- The documentation and handling of the products are clearly structured and well defined
- The students learn very fast to control the system and can work with it independently
- The Instructor illustrates the entire hydrogen cycle (from generating to using hydrogen in the fuel cell)
