

Press Release: September 1st 2003

**Heliocentris Energiesysteme GmbH, Rudower Chaussee 29
12489 Berlin, Germany**

Heliocentris, a sponsor at the 60th International Motor Show (IAA)

Heliocentris, located in Berlin-Adlershof, Germany and Vancouver, Canada produces educational equipment and training material on fuel cells. The products are sold throughout Europe, North America and Asia.

With more than 15,000 fuel cell products sold to date, Heliocentris is one of the few companies worldwide with experience in providing fuel cell products to end users. In the field of fuel cells for use in education Heliocentris is the world leader.

At the 60th International Motor Show in Frankfurt, Germany (September 11-21, 2003) the “NP50”, a fuel cell product from Heliocentris will be presented in hall 9.1, the booth of the Hessian Ministry of Trade and Commerce A12 through the Technical College of Wiesbaden. The NP50 is a 50-watt grid independent fuel cell power supply designed for use in postsecondary education. With this unit, the various parameters that determine the output of a fuel cell power supply can be measured and controlled.

On September 17, “Education Day” Heliocentris will sponsor to a local high school 10 fuel-cell model car science kits. The handing over of these kits will be done by Dr Henrik Colell, CEO of Heliocentris and will take place at the booth of the Hessian Ministry of Trade and Commerce (booth A12 in hall 9.1). For this event, representatives from the local high school, the Hessian Ministry of Trade and Commerce, the Technical College of Wiesbaden and representatives from the press have been invited. At the Hessian booth, throughout “Education Day” a variety of talks will be given on new professions within the automotive industry.
