

Heliocentris at H₂-Expo in Hamburg, Germany

About Heliocentris:

Heliocentris, located in Berlin-Adlershof, Germany and Vancouver, Canada produces educational equipment and training material on fuel cells. The products are sold throughout Europe, North America and Asia.

With more than 15,000 fuel cell products sold to date, Heliocentris is one of the few companies worldwide with experience in providing fuel cell products to end users. In the field of fuel cells for use in education Heliocentris is the world leader.

Press Release:

At this years **H₂-Expo (October 9th -11th, 2003)** in Hamburg, Germany Heliocentris will be presented in several ways.

At booth 4125, in hall 4 Heliocentris will present its new product line **Hy-Expert™ Instructor** to the public: A complete 40-watt fuel cell power supply for post secondary and vocational education. New technology for new professions! Another highlight at the Heliocentris booth will be a new product from Heliocentris gift and presentation brand **Hy-Exclusive™**. Come and see it!

On October 10th, there will be a special "Youth Day" at H₂-Expo, called "Hydrogen for Kids" where young people will have the chance to learn about sustainable methods of energy production. About 100 young scientists will have the opportunity to gain experience with solar hydrogen technology. Experiments will be performed by scientists from the GKSS Research Centre located in Geesthacht using apparatus primarily from Heliocentris. Among all participants of the "Hydrogen for Kids" day a fuel cell science kit sponsored by Heliocentris will be raffled in the afternoon.

Also on October 10th between 12:30 and 1 pm Heliocentris will be an active participant of a panel discussion entitled "Small fuel cells – big market".
