

**Heliocentris and Angstrom Power Partner to Launch  
Micro Fuel Cell Educational Products**

**Press Release:**

Berlin and Vancouver, November 17, 2006: Heliocentris Fuel Cells AG and Angstrom Power Inc. have partnered to develop and market educational products using the latest in Angstrom micro fuel cell technology. Angstrom will supply fuel cell stacks and data acquisition technology while Heliocentris will handle educational product design, system integration and global distribution.

Angstrom Power is a leading company in the development and commercialisation of micro fuel cell technology, while Heliocentris is an internationally recognized leader in the development and distribution of fuel cell systems for educational institutions. Students around the world can now use the newly developed Heliocentris Micro Fuel Cell Systems to run a variety of experiments and explore how Angstrom's Micro Fuel Cells can power commercial electronics.

"We are pleased to be working with Heliocentris to bring our state-of-the-art and cost effective fuel cell technology to the scientific and educational markets," says Paul Zimmerman, CEO of Angstrom Power. "Angstrom is excited to apply its Micro Hydrogen™ technology to contribute the knowledge of future scientists and engineers in the field."

Henrik Colell, Heliocentris' CEO, couldn't agree more: "There is a high degree of synergy between our two companies. Heliocentris' leading position within the fuel cell education space will help broaden Angstroms exposure to tomorrow's engineers and scientists, while Angstroms products will round out our product offering to secondary and post-secondary institutions. The Angstrom technology is ideal for incorporation into science and engineering classes, as well as for student design projects."

Heliocentris and Angstrom will first display their new micro fuel cell education systems at the Fuel Cell Seminar ([www.fuelcellseminar](http://www.fuelcellseminar)) in Honolulu, Hawaii November 13 – 17th. Heliocentris will offer both a school product and a more advanced system for post secondary institutions. In the future Heliocentris plans a series of products using Angstrom's Micro Fuel Cells to help students around the globe explore the world of fuel cell integration into electronic devices.

**Heliocentris Fuel Cells AG:**

As a pioneer in the fuel cell industry, Heliocentris has over ten years experience in the production of fuel cell products. Heliocentris focuses on Education and Science markets worldwide with more than 10,000 end customers in over 50 countries. Heliocentris is one of the global leaders in this field. Clients can choose from over 30 products divided into 6 product lines ranging in complexity from basic fuel cell kits to complete lab equipment. Heliocentris plans continued growth through innovative new product development for the education market as well as through fuel cell systems designed for industrial applications. Heliocentris is headquartered in Berlin, with a subsidiary located in Vancouver, Canada for coverage of the North American market. **Angstrom Power Incorporated:**

Angstrom Power Inc. is a Vancouver-based company founded in 2001 to develop and commercialize micro-structured fuel cells based on a novel fuel cell architecture. The unique fuel cell architecture, combined with innovative concepts for hydrogen fuel and integrated into passive Micro Hydrogen™ systems, enables high energy density in small form factors suitable for portable devices like cell phones. Angstrom Power has successfully built prototype devices and is currently in the process of developing products for industrial and consumer markets. The family of products includes end-user devices as well as products for refueling. The refueling can either be portable using cartridges or fixed using existing hydrogen infrastructures. To-date, Angstrom has over 50 patents filed and/or issued representing a deep intellectual property base. For more information: [www.angstrompower.com](http://www.angstrompower.com)
